Release Notes: WP Sprint 001: v4.4.3.017

Version 1.0

1. User Documentation

1.1. Bug Fixes

1.1.1. Task Search

Task Search Title on the Search Result screen sometimes displayed the incorrect search option.

1.1.2. My Email

Included assimilation and delete functionality within Personal Folders.

1.1.3. User Profile - Personal Task Settings

Corrected exception message when adding bulk tasks if "Task Classifications" is unchecked. I.e. not be a required field when adding tasks.

1.1.4. Task Administration - Processes

Corrected exception message when importing a Process Definition that contains a flow that has a transition back to itself. This is now a valid procedure.

1.2. Changes

1.2.1. Task Search Screen

Jump buttons has been added to aid in navigation and search results can now be sorted (Ascending/Descending order). Search result duplication has removed and titles representing the type of search, i.e. tasks and/or activities, have also been corrected.

1.2.2. Task Administration – Task Reports

Changed "Activity Time Report" to allow for Entry and Time exclusions.

1.2.3. My Tasks - Activities

Changed Activity Action Panel on the Show Task screen to a new look and feel.

1.3. New Features

1.3.1. Advanced Task Search (excluding Task Activities and Process Attributes)

1.3.2. Removing an email in inbox from the Add Task screen when creating a task

1.3.3. Added Personal Task Settings and Auto Archiving of Tasks (move notifications) in the User Profile section

1.3.4. Improved Internal Resource screen layout and functionality in the Administration Interface.

2. System Documentation

2.1. Model Alterations

2.1.1. Added Attachment Objects for Photo, Identification Document to Resource

2.1.2. Removed Email Text Field from Resource
